

11 - 470 mm

BERA  Pedestals HiLo Fix

Decking & Paving Support

BERA®

INTRODUCTION

BERA® Pedestals HiLo Fix have been designed by and for professionals in creation of gardens and terraces. They are made of 100% recycled and re-enforced polypropylene, eliminating the need for bedding sand and/or of brick or other methods for installation of raised ceramic pavers or wooden/composite decking. Easy drainage of water and installation of electric systems under the void space ensures extended life-span of the decking material and pavers and high quality finish of the terrace. Damaged ceramic tiles can easily be replaced without any difficulties.

The large surface of each and every pedestal of more than 300 cm² ensures compliance with French and other International Standards whilst protecting the roof-decking against puncture. The pedestals are extremely stable in vertical and horizontal directions and are available from 11 till 470mm. Exactly adjustable in height using fast-turning ring reduces the installation cost to a minimum.

BERA® Pedestals HiLo Fix come with accessories including a slope corrector which can be placed at the bottom of the pedestal to enable compensation up to 7%. Compensation discs either hard or soft are available for reducing sound transmission.

BERA ensures consistent limited environmental by these recyclable and durable supports, assembled in Europe by our disabled staff under best working conditions and under ISO9001 QAS.

Standard : in compliance with DTU 51-4 & DTU 43-1 (NF P 84.204)
 Quality : Made in Europe under ISO9001
 Safety : REACH

TESTING

Applications

BERA® Pedestals HiLo Fix have proven records for fast and effective installation of wooden and composite decking, but also to provide a solution for the ceramic tiles terraces. Applications are typically terraces or raised floors in gardens, around swimming pools and terraces at restaurants.

With the upcoming green-roofing BERA is offering the opportunity to create integrated solutions the lounge area. Also balconies or penthouses are easily renovated using pedestals and ceramic tiles. Finally raised floors for exhibition-booth and showrooms can be created and dismantled in short period of time.

A team of experts at BERA Sales Office is available to assist in your specific project requirements. Hands-on and fast support to architect and contractor exceeding the owners expectations.

PROJECTS

BERA® is the trademark of BERA B.V. of The Netherlands, a company which develops stabilization systems, eco systems and prestigious outdoor living concepts.

With the company's historical roots & wealth of know-how in landscaping and architectural fields, they create innovative and environmentally sustainable solutions, supplied throughout Europe, the Middle-East, South Africa and S-E Asia regions.
